

Pathfinder[®] air-cooled chiller with RapidRestore[®] and Fast Loading option

Restore cooling and peace of mind in as fast as 30 seconds

A power loss could turn into a critical loss of cooling in mission critical facilities such as data centers, health care buildings or manufacturing processes. A short-term power loss can happen during power interruptions, brown-outs or utility switching operations.

The Pathfinder Chiller is available with a RapidRestore option that allows it to start as fast as 30 seconds after power is restored. In addition, the Fast Loading option can restore full load cooling capacity in less than 5 minutes. So your critical cooling is restored before it's missed.

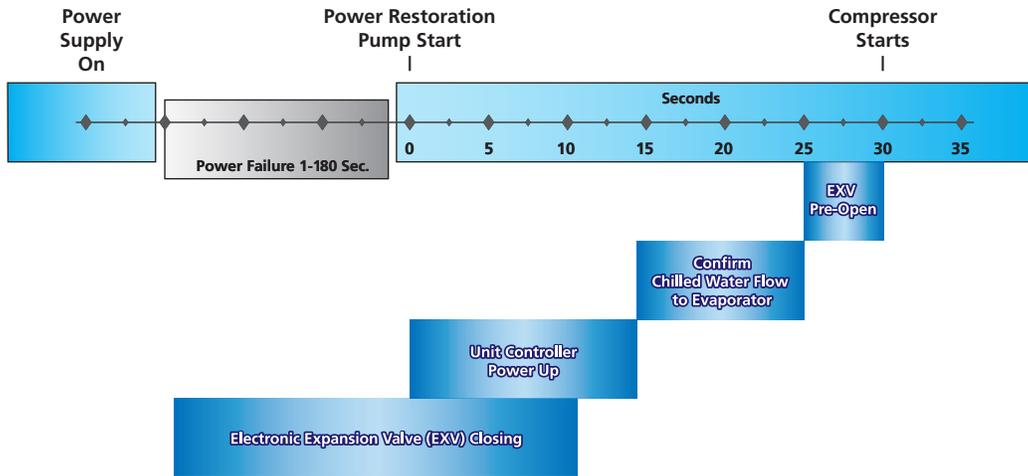

Pathfinder air-cooled chiller
170 to 550 tons

RapidRestore and Fast Loading benefits

- Faster return to necessary cooling levels
- Keep heat-sensitive servers on-line
- Maintain patient comfort in critical care areas
- Eliminate downtime in manufacturing processes

Why trust your mission critical facility to any other chiller?

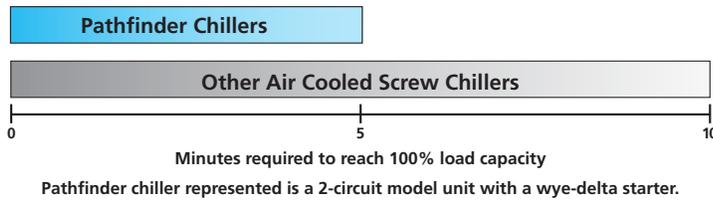

Critical Timelines for Pathfinder Chiller with RapidRestore and Fast Loading Option

Fast Loading to 100% Cooling Capacity

Once power has been restored and the chiller is back online, the next critical step is reaching 100% cooling capacity as fast as possible. That's when the Fast Loading ability of a Pathfinder chiller with RapidRestore proves its worth. With Fast Loading, the Pathfinder chiller can reach 100% cooling capacity in less than five minutes – while other comparable air-cooled chillers need 5 to 10 minutes.

Fast Loading Timeline Comparison

Pathfinder chiller represented is a 2-circuit model unit with a wye-delta starter.

Why the Daikin Pathfinder Chiller is the Best Choice in Air Cooled Chillers

- Industry leading efficiency at full load and part load
- Quietest sound levels published
- Largest capacity air-cooled screw chiller, up to 550 tons
- Small footprint to optimize space and reduce installation costs
- Performance that can contribute to multiple LEED® points
- D-Net® Performance Services option for enhanced reliability
